

Deformation Theory of Embedded Curves and Its Application

Hirokazu Nasu

Tokai University

September 17-18, 2026

KU Lectures in Algebraic Geometry 2026

Today's slide

Plan of Talk

- September 17 (Day 1)
 - ① Basics of deformation theory (Infinitesimal deformations, obstructions, Hilbert schemes, etc.)
 - ② Mumford's example (Starting point)
- September 18 (Day 2)
 - ③ Obstructedness criterion and applications
 - ④ Recent results on deformations of curves in $S_{2,2,2} \subset \mathbb{P}^5$
